

# EMERGING NEW ENERGY LANDSCAPES OF HYDRAULIC FRACTURING

OLAF SCHROTH

Olaf will be discussing the landscape and visual impacts of hydraulic fracturing (“fracking”) and the related challenges for landscape architects.

The session will start with an input presentation about hydraulic fracturing and the specific characteristics of such projects based on experiences from the Marcellus Shale in the US and exploratory wells in Lancashire, UK.

Afterwards, Olaf will discuss potential implications for landscape architects, particularly in the context of Landscape and Visual Impact Assessment (LVIA).

SLR Consulting Ltd. welcomes you to an evening presentation by Olaf Schroth (University of Sheffield) on Wednesday 5th July, 6pm start.

To be held at:  
SLR Consulting Limited  
Aspect House, Aspect Business Park  
Bennerley Road, Nottingham  
NG6 8WR
